IAQ PRO Med1

AGILE

Equipment hire when you need it!

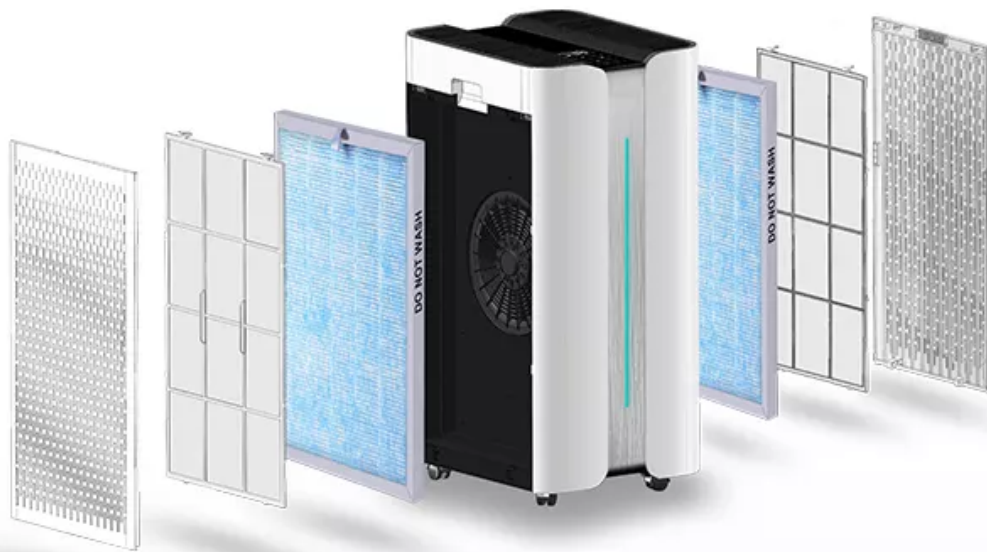

Distributed by Agile Equipment Hire - Agileequipmenthire.com.au

Product Specifications

Item Model	IAQPRO Med1
Name	Air purifier
Optional Color	White
Power	85W - 102W
Voltage/Frequency	50/60
Air Flow(CADR)	1000m ³ /H
Motor Type	DC
Negative Ion	8,000,000 PCS/CM3
Applicable Area	120m ²
Net Weight	19.5KG
Gross Weight	23.5KG
Product Size	400*400*750 mm
Carton Size	450*450*850 mm

- Smart Panel
Fashion LED Lights
- Four Speed
According to the air condition
- Air Quality Control
Internal Air quality monitor
- Auto Control
- High Performance Plasma
Forest air quality
- Sleep Mode
Ultra low mute
- Intelligent Timing
1-8 hours timing
- Kids Lock
Make parents more reassured
- WiFi
Mobile phone APP remote control

Five Layer Filtration Seven Purify Way

- front panel
- Primary filter screen
- Integrated integrated filter screen

3 Advantages Powerful Purification

1/ UVC Disinfection

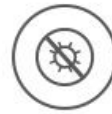

P8002 uses H13HEPA filter to intercept small particles attached to pathogens, and at the same time uses 2 C-band LED UV lamp, with a total irradiation intensity of 300mW, which is irradiated into the filter and airflow to achieve filtering of air and small particles that have blocked pathogens. The net is disinfected by irradiation. The C-band UV lamp can destroy the molecular structure of DNA or RNA in the cells of the germ and let the bacterial cells die, achieving the effect of sterilization.

253.7 wavelength

C-band

Kill rate 99%

3/ Efficient Air Duct Structure

1000m³/h CADR
Indoor air quickly renewed

The unique air duct design allows the CADR of particles to be as high as 1000m³ / h. The air is circulated on both sides and at the top to form an efficient air circulation, which efficiently purifies bacteria, viruses, formaldehyde, dust and other pollutants in the air, allowing the indoor air to quickly Purification and disinfection make you feel in the fresh air of nature.

HD LED Display

HELP MONITOR FILTRATION

HD LED display shows the particle index number and filter service in real time. You will be instantly aware of the air quality conditions, and then, know when to change your filter.

Filter Service Life

Can be clearly seen to monitor filtration function

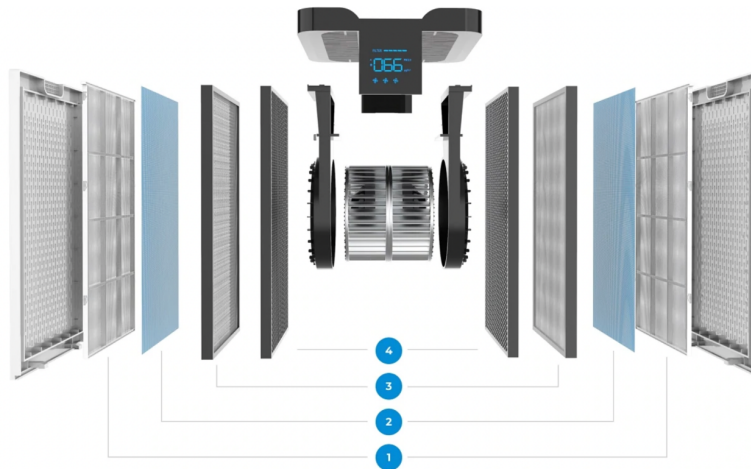

Fan Speed Display

Four different Speed settings

PM2.5 Index Number

Real-time data response to air quality

1

Plastic Pre-filters

2

NON-WOVEN Cloth Filters

3

The H13 Medical-grade HEPA filter

4

Activated Carbon Filter
